

Vario Wall

DESCRIPTION

The Vario wall, the wall that does it all. Install a block unit, slide another one over it, and so on. This results in a modern wall with clean lines.

Versatile and innovative, this product can be used for retaining walls, creating privacy spaces and outdoor kitchens. Available in two heights (90 or 180 mm), the Vario wall is perfect for steps and modular installations.

Note that all units are double-sided, and that they are all (including corner units) on the same pallet. Their popular colours fit perfectly with Permacon's numerous cappings.

BENEFITS:

- > Quick and easy to install
- > No accessories required
- > All double-sided units
- > 90 mm and 180 mm heights, ideal for steps and modular installations
- > Smooth texture
- > Available in trendy colours that match slabs, pavers and capping units
- > Build retaining walls, raised gardens, double-sided walls, outdoor kitchens, and more!

The information contained in these technical documents is supplied for information purposes only. Any application of the information is the sole responsibility of the installer. The installer must ensure that the installation and use of retaining wall projects comply with local regulations and code requirements. A qualified engineer must be consulted for final design for construction purposes. Oldcastle Building Products Canada, Inc. and its affiliates cannot be held responsible for the improper use of information contained in these technical documents.

90 mm UNITS

Note that Short, Medium and Long units are packaged on the same cube.

90 mm RIGHT CORNER UNITS

Only Long and Medium units are available as corners. On corner units, the groove does not run the full length.

90 mm LEFT CORNER UNITS

Only Long and Medium units are available as corners. On corner units, the groove does not run the full length.

ADDING CAPPING TO A VARIO WALL - LAST ROW

On the last row of the Vario wall, reverse the unit so that the tongues are facing down. Then, use Techniseal concrete adhesive to glue the Permacon capping of your choice.

TYPICAL ROW

4 integrated corners per row: 1 right long, 1 right medium, 1 left long, 1 left medium

CREATING OUTER AND INNER CORNERS

It is recommended to always begin the construction of a retaining wall with a corner in order to avoid cuts and an alignment of vertical joints from one row to another. We advise the use of Techniseal concrete adhesive to glue the corner units together to ensure increased stability.

CROSS-SECTION - SETBACK WALL

Vario Wall 90 mm installed with a setback (30 mm per row) can go up to 12 rows (total height of 1080 mm or 42 3/4 in.)

- > Create the setback by installing the outer groove (female) on the tongue (male) at every row
- > At the very last row, turn the unit upside down to have the tongues downward. Then, use Techniseal concrete adhesive to glue the capping unit of your choice.

No accessory required for the Vario Wall. You don't have to use concrete adhesive between each row of the Vario Wall.

12 ROW SETBACK WALL – WITH SURCHARGE, NO SLOPE

Vario Wall 90 mm installed with a setback and geogrid – 12 rows (total height of 1080 mm or 42 in.). With surcharge behind the wall (5kPa), no slope.

- > Install Vario Wall 90 mm units in pairs: create a 30 mm setback by following the tongue and groove system on every other row
- > Create the setback by installing the outer groove (female) on the tongue (male) at every other row
- > Always position the tongue on the outer side of the wall
- > Add a 1250 mm long geogrid (50 in.) over the Vario Wall unit. The geogrid is held by the tongue and groove system and the weight of the clean stone. Recommended geogrid: Miragrid 2XT
- > At the very last row, turn the unit upside down to have the tongue downward. Then, use Techniseal concrete adhesive to glue the Permacon capping of your choice.
