Vario Wall

DESCRIPTION

The Vario wall, the wall that does it all. Install a block unit, slide another one over it, and so on. This results in a modern wall with clean lines.

Versatile and innovative, this product can be used for retaining walls, creating privacy spaces and outdoor kitchens. Available in two heights (90 or 180 mm), the Vario wall is perfect for steps and modular installations.

Note that all units are double-sided, and that they are all (including corner units) on the same pallet. Their popular colours fit perfectly with Permacon's numerous cappings.

BENEFITS:

- > Quick and easy to install
- > No accessories required
- > All double-sided units
- > 90 mm and 180 mm heights, ideal for steps and modular installations
- > Smooth texture
- > Available in trendy colours that match slabs, pavers and capping units
- > Build retaining walls, raised gardens, double-sided walls, outdoor kitchens, and more!

CROSS-SECTION - SETBACK WALL

Vario Wall 180 mm installed with a setback (30 mm per row) can go up to 4 row (total height of 720 mm or 28 in.)

- > Create the setback by installing the outer groove (female) on the tongue (male) at every row
- > Always have the cavities on the inside of the wall
- > You don't have to fill the cavities with clean stone in a standard installation
- > At the very last row, turn the unit upside down to have the tongues downward. Then, use Techniseal concrete adhesive to glue the capping unit of your choice.

No accessory required for the Vario Wall. You don't have to use concrete adhesive between each row of the Vario Wall.

6 ROW SETBACK WALL – WITH SURCHARGE, NO SLOPE

Vario Wall 180 mm installed with a setback and geogrid – 6 rows (total height of 1080 mm or 42 in.). With surcharge behind the wall (5kPa), no slope.

- > Create the setback by installing the groove (female) on the inner tongue (male) of every row
- > Always install with tongue towards the outside of the wall
- > Fill the cavities of the 180 mm units with clean stone
- > Add a geogrid of 1250 mm (50 in.) long over the Vario wall unit. The geogrid is held by the tongue and groove system and the weight of the clean stone. Recommended geogrid: Miragrid 2XT
- > At the very last row, turn the unit upside down to have the tongue downward. Then, use Techniseal concrete adhesive to glue the Permacon capping of your choice.
- > You don't have to use concrete adhesive between each row of the Vario Wall.
