200 mm
8 po
min.

Largueur excédentaire
300 mm - 12 po min.

-
- The diagram illustrates a cross-section of a concrete curb. The curb has a top width of 200 mm (8 inches) minimum. It is reinforced with four vertical bars labeled A, B, and C, and one horizontal bar labeled D. The curb is shown on a base of compacted material, with a sloped side and a vertical face. The width of the curb at the base is indicated as 'Largeur excédentaire 300 mm - 12 po min.' (Excess width 300 mm - 12 inches minimum).
